The UK'S Most Advanced NON-SURGICAL FACE & BODY TREATMENTS -

Combined Non Surgical Facial Toning & Microdermabrasion System

The result of over 20 years research, the award winning CACI Facial Toning treatment has been voted the most effective anti-ageing treatment available. The CACI Ultimate is the only treatment system to combine CACI Non Surgical Facial Toning, Crystal Free orbital Microdermabrasion and LED Light Therapy.

MICROCURRENT - Tiny electrical impulses firm & tone sagging facial muscles and smooth the appearance of fine lines & wrinkles. Due to it's dramatic lifting and toning effect, the CACI microcurrent treatment has become known as the "Non Surgical Face Lift".

ORBITAL MICRODERMABRASION - This new exfoliation technology uses a hand piece with an abrasive tip that rotates at different speeds on an elliptical axis. The hand piece also features the healing action of LED light therapy, which can be used simultaneously with orbital microdermabrasion or with a special massage head to stimulate the connective tissue, which improves circulation and lymph drainage. Light therapy using wavelengths of coloured light has a antibacterial healing action on skin cells and has been proven to be effective for the treatment of acne & skin blemishes.

WRINKLE COMB (LED LIGHT THERAPY) - The system's wrinkle comb combines LED photo stimulation with high frequency microcurrent. The synergy of these two technologies plumps out and softens lines, wrinkles and stretch marks thereby providing non invasive, needle free alternative to collagen injections and other dermal fillers. The system has three options that are particularly effective at treating acne and skin blemishes. Hydratone combines active microcurrent rollers with Hydro Mask, a unique, electrically conductive silicon gel mask that has been infused with powerful hydrating properties. The rollers gently massage the face causing the mask to become electrically charged so that the whole face is bathed with rejuvenating energy. The current delivered by the rollers recharges and replenishes the bio-electrical energy within the facial muscles, restoring tone and firmness.

Electro Cellulite Massager (ECM) - The ECM attachment combines the therapeutic benefits of massage with the effectiveness of microcurrent therapy. The stimulatory action of the ECM tones muscles and reduces inches by improving lymph drainage and breaking down fatty deposits

AMINO-LIFT PEPTIDE COMPLEX - Developed for use at home. Packed with powerful amino acids, peptides and essential oils to deliver face lift effect after just 28 days! Amino-Lift peptide complex can significantly reduce expression lines and wrinkles and help to lift and define facial contours.

QUESTIONS ABOUT TEETH WHITENING

Restrictions on teeth whitening - Do I qualify? Treatment will not be offered to those with chemically induced asthma, pregnancy or breast feeding, under 18 years, on certain medication, or undergoing dental treatment.

Who may benefit from LoveLite Teeth Whitening? - Almost everyone. Today it is quite possible for you to get the extreme makeover smile formerly reserved for the rich and famous. LoveLite Magenta teeth whitening system is ideal for patients who have healthy unrestored teeth and would like to have a whiter, brighter smile. The LoveLite whitening process is most effective on moderately discoloured teeth. Darker stains, such as those caused by antibiotics, take longer to respond to treatment. The degree of whiteness will vary from patient to patient, depending on the structure of the teeth and the duration of time that the system is used.

New to Cornwall - LipoGlaze

Lipoglaze by LoveLite Ice is not an invasive liposuction treatment, it is a liposuction alternative. It provides clients with the option of fat removal without surgery and is a much friendlier treatment for both men and women, which helps to deliver fast results.

Our specially formulated liposuction alternative, Lipoglaze, gently warms up the treatment area which then encourages blood and fat to separate. Then by using Cryotherapy, Lipoglaze carefully freezes away fat cells and thus provides clients with a fat removal treatment without surgery.

With Lipoglaze expect to see temporary mild redness, tingling, tenderness, cramping along with soreness. But remember! These are all impermanent!! However after the surgical Liposuction the risks include: excessive bleeding, infection and scarring as well as uneven or excessive skin. So why take risks?

The Lipoglaze system uses a powerful non-invasive suction to target areas of the body with unwanted or excess fat. A single Lipoglaze Treatment from LoveLite can destroy on average 26% of fat.

A Lipoglaze treatment takes up to one hour to complete, you won't even feel the fat cells crystallise and then break down, disappearing for good! Once your treatment is complete, you need to let your body to rest and relax.

To book a Lipoglaze treatment or a free consultation with our LoveLite Ice Team, simply call Sam on 01637 872255 or 077250 25502 & a member of our team will be happy to help you.

FACIALS

Faith Lift Facial – Actress Sienna Miller is a fan! **45 min of lifting heaven £30** **Course of 6 £150**

Double cleanse, tone, mask and moisturise. You will be looking and feeling years younger.

When Faith Lift Mask is applied it forms an elegant film that will tighten and smooth the skin. This perceivable phenomenon is due to physical changes in the polymer structure of the polysaccharides as they dry on the skin. This gentle sensation of smooth skin will last for hours, in some cases days, without the skin flaking or leaving it overtly tight. Faith Lift Mask is a naturally derived skin tightening mask that will help to physically lift sagging skin, reducing the appearance of lines and wrinkles.
